

Healthy Soils Program Update

RJ
LAWN &
LANDSCAPE

Offering you the best options in providing healthy, green lawns in a socially & environmentally responsible way.

What Makes RJ Lawn & Landscape different?

- Our lawn technicians are not just trained how to run equipment... they have formal education in turfgrass management as well as actual hands-on experience and knowledge.
- We maximize our time on your lawn by giving it all the nutrients & weed control it needs in just 5 treatments.
- Whether selecting Program A or B, we only use the highest quality products to drive value and provide the best turf care possible. Approximately 65% of the nutrients are released in the first two weeks – this will make your lawn greener *faster*; The remaining 35% slow release reintroduces organics back into soil – this will make your lawn greener *longer*;

Which Package should I choose?

- Program B will be our standard minimum lawn care package. It will include all of the above benefits in an environmentally responsible way to deliver the 4 Rs of Nutrient Stewardship:
 - ✓ the RIGHT fertilizer source
 - ✓ at the RIGHT rate
 - ✓ at the RIGHT time
 - ✓ with the RIGHT placement
- Program A is our premium lawn care package which will include all of the above PLUS:
 - + Additional Organic Fertilizer applications at the time of Broadleaf Weed treatments.
 - + Increased level of Nitrogen over the growing season;
 - + Increased organic nutrients for improved soil & root zone health
 - + Additional spot treatment of weeds
